

SESSION 05 • YEAR TWO — UNDERSTANDING THE PROCEDURES

Reading the Ridge

How to Know What Will Happen Before You Extract

PRESENTED BY

Jonathan Misch, DDS, MS

CEO, Misch Implant Institute

@drjmisch

Before a tooth is extracted, the ridge is already telling you what it will do. Built on Dr. Mauricio Araújo's research, this session teaches you to evaluate a site pre-extraction and predict whether it will heal favorably, need preservation, or require staged grafting.

LEARNING OBJECTIVES

- 01** Evaluate an extraction site to predict socket healing before the tooth is removed.
- 02** Determine whether a site favors immediate placement, ridge preservation, or staged grafting.
- 03** Apply Araújo's research to generate earlier, better-timed referrals.
